
Relationships between Medical Schools and Teaching Hospitals

**S.Bruce Downton
UNSW - Sydney
Australia**

-
- **Some of the issues ...**
 - **Outcome from this session ...**

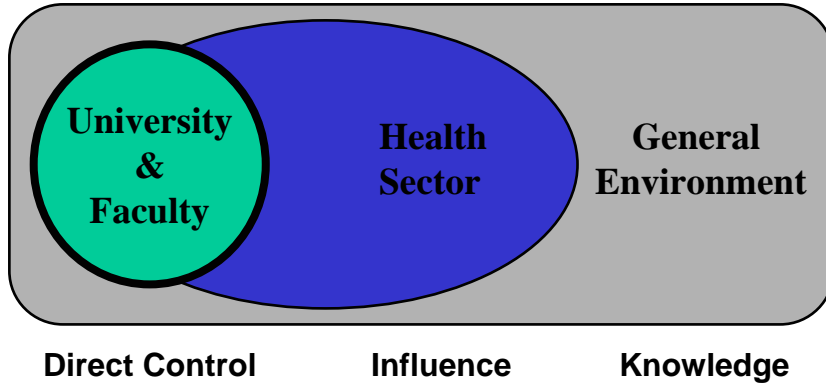

Outcome of this session ...

- **Is there merit in understanding more fully the common issues across all or some of the U21 medical schools concerning relationships between medical schools and affiliated hospital / health care organisations ?**

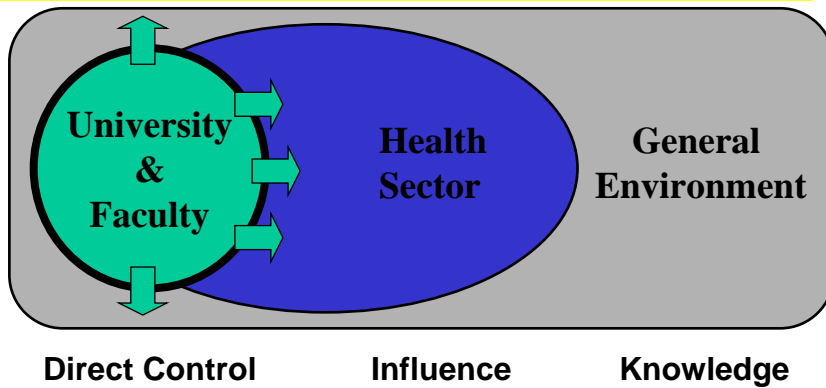

Issues

- **Changing Governance Relationships**
- **A Range of Practical Matters**
- **Performance Indicators for hospitals and medical schools**
 - mutual addition of value

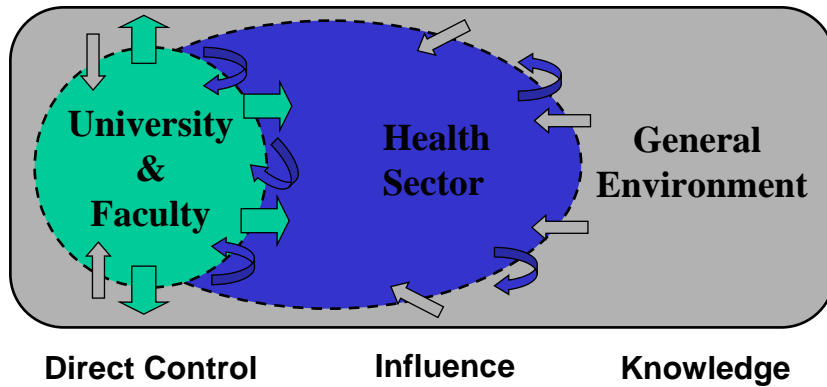

Many Medical Schools ...the past

Medical Schools ... in transition

Medical Schools ... the future

Practical Matters

- **Support for academic activities**
 - academic & general staff salaries,
 - research support
 - space and facilities
 - accommodation for students
 - ...

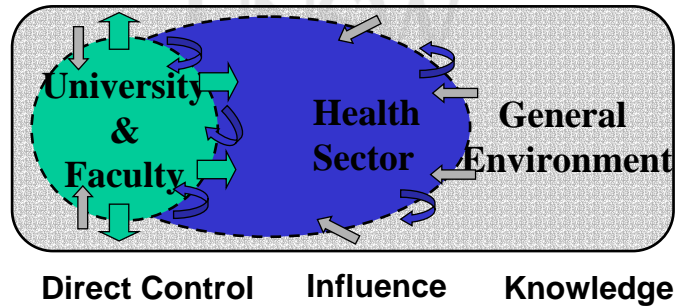

Practical Matters

- **A Range of Governance Styles...**
 - fully owned and operated by University
 - inter-related and inter-dependent with private and public organisations
 - completely independent
 - e.g. purchaser - provider

Philosophical Matters

- **Performance Indicators**
 - research productivity
 - engagement in student teaching
 - quantity
 - quality

Maximising value ... understanding mutual interdependence

Outcome of this session ...

- Is there merit in understanding more fully the common issues across all or some of the U21 medical schools concerning relationships between medical schools and affiliated hospital / health care organisations ?

Possible Outcomes

- Expansion of Anecdotal Shared Understanding
- Sharing of Relevant Documents
- Analytic work over relevant information (documents / surveys)
 - position paper
 - publication
